### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

This Office Action is in response to Restriction/Election Requirement. Applicant has elected Group I, consisting of claims 1-9, 20, without traverse.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Klug et al. (hereinafter "Klug", US 6,823,327 B1).

As per claim 1, Klug discloses an information processing apparatus terminal device, capable of transmitting information comprising:

- receiving means receiving a request signal transmitted from the terminal device (column 2, lines 7-10, 37-41);
- user identifier generating means for generating identifier corresponding to request signal (column 2, lines 13-15, 41-45);
- generation source identifier storage means storing a generation source identifier identifying a generation source of the user identifier (column 2, lines 13-15, 41-45)

Art Unit: 2157

- user transmitting means for transmitting the user identifier and the generation source identifier to the terminal device (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

As per claim 2, Klug discloses the information processing apparatus according claim 1, wherein the receiving means receives the request signal requesting the information processing apparatus to issue a user password identifying a user operating the terminal device and to issue an introduction password indicating the generation source of the user password (column 2, lines 13-31).

As per claim 3, Klug discloses the information processing apparatus according claim 2, wherein the receiving means receives individual information of the user operating the terminal device (column 1, lines 47-60).

As per claim 4, Klug discloses the information processing apparatus according to claim 3, wherein the receiving means receives request signal requesting issue of the user password and the introduction password that are used for accessing homepage information contained within an other information processing apparatus, specifies the homepage information the information processing apparatus that introduces the homepage information of the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

Art Unit: 2157

As per claim 5, Klug discloses the information processing apparatus according to claim 3, further comprising individual information storage means for storing the received individual information (column 5, lines 14-17, 29-31, 35-38).

As per claim 6, Klug discloses the information processing apparatus according to claim 5, wherein the user identifier generating means generates a user password corresponding to the received individual information, and transfers the generated user password to the individual information storage means that stores the transferred user password correspondingly to the individual information (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

As per claim 7, Klug discloses the information processing apparatus according claim 1, wherein the generation source identifier storage means stores the generation source identifier identifying homepage information (column 5, lines 14-17, 29-31, 35-38).

As per claim 8, Klug discloses the information processing apparatus according to claim 7, wherein the generation service identifier storage means stores an introduction password as the generation source identifier identifying the homepage information (column 5, lines 14-17, 29-31, 35-38).

Art Unit: 2157

As per claim 9, Klug discloses the information processing apparatus according to claim 1, wherein the user identifier and the generation source identifier are used when the terminal device accesses information contained within an other information processing apparatus, and the transmitting means transmits the user identifier and the generation source identifier to the other information processing apparatus (column 2, lines 5-25, column 4, lines 24-33, column 5, lines 1-7, 18-25).

As per claim 20, Klug discloses an information processing method comprising the steps of:

- receiving a request transmitted from a terminal device (column 2, lines 7-10, 37-41);
- generating a user identifier corresponding to the request (column 2, lines 13-15, 41-45);
- transmitting the generated user identifier and a generation source identifier which identifies a generation source of the user identifier stored in an information processing apparatus to the terminal device (column 2, lines 7-10, 37-41, column 11, lines 8-13, 43-50).

### ***Conclusion***
